

Collin Quiring has worked in the area of Project Management for over 15 years. He has implemented Project Management Office's for two separate companies during that time and has worked with clients across industries and of various sizes. This includes Fortune 100, Global 100, mid-market and small-market organizations.

During his career, he has developed a passion for helping organizations better understand their Project and Resource Management needs and the methodologies to obtain and maintain that information. His focus is on aligning an organization's strategic objectives with the business and technology processes required to demonstrate effective results.

From a technical perspective, Collin is an expert in Microsoft Project Server. He has worked with all aspects of the tool from installation to configuration to daily administration. Due to his business perspective and insight, he has always worked with clients to have the software match the business needs as much as possible— rather than forcing the business to change everything they do to match a software setting.

Collin is a Project Manager, Consultant, Trainer and Speaker for Project Management and Microsoft Project Server. He is the managing partner with PMP Specialists and holds PMP, MCTS, MCP and CIRM certifications along with an MBA.
