

IT Manager

1001470524 - Direct Hire

Technisource is seeking an IT Manager that will oversee the reporting department of a large organization. The position is a permanent position and is based in Overland Park, KS.

The qualifications we are seeking includes; 3 years of financial services or insurance experience, experience in report development, and business intelligence experience (preferably Oracle Business Intelligence (OBIEE)). Additional experience we are seeking includes Oracle data warehouse experience and experience working with MS tools and/or programming languages.

This person will be responsible for managing the reporting department of a large organization. This department contributes heavily to the overall success of the enterprise by providing timely data and intelligence that is used to guide key business decisions. This role involves day-to-day oversight of the department and personnel. This person will be involved in the planning, project scope definition, implementation of solutions, and coordination of tasks, projects, and resources.

1001480105 - Direct Hire

Our client is looking for a Strong Program Manager to manage product development projects. Responsibilities include managing multiple projects that are 3 to 6 months in duration. The candidate will be responsible for managing product implementations. 3+ years of Project Management experience. SQL skills and Financial industry experience a plus.
